"Love my 4 Rivers Equipment. I can work cattle for hours

Even those new born calves fit nice and secure in the squeeze chute."

and our systems in action by scanning this QR code to see this customers testimony and more!

"Quality product great delivery and set up experience,

good customer service. I would definitely buy again and in fact just expanded my current set up. Highly recommend."

"I've had a 4R53 system w 4 Diamond chute for a couple years now.

Love the entire system. Work around 35 cows plus calves and couple bulls through it multiple times by myself now and love it. Great price for a great system"

"I have been using this chute for over a year now, I really like how easy it is to use

we have dehorned, cut, doctored, flushed for ET, also AI'd, and Trich Tested bulls. One bull weighed 1,820 pounds! The palp door on the left is split which you can close behind the animal which is very safe for the Veterinarian or AI tech we have always used a chute with palpation doors that close to the back however with this chute it makes everything a lot safer for you.

At 76 years of age it is easier for me to use and I have a gal that says it's easier for her to use."
